SCTE Cable-Tec 2022 Session Spotlights

By: [Pipeline Magazine](#)

Special sessions are spotlighted each day of the event so that you are aware of all the great presentations that are available for you to attend at SCTE Cable Tec 2022. Check below and back each day of the show for updated, special session spotlights from the previous day, current day, and next day!

Session Spotlight:

[Next-Generation NFV Incorporating Cloud Operating Model, presented by IBM](#)

Room: Innovation Theater
Time: Thursday, September 22, 2022: 9:30 AM - 10:00 AM

Speaker:

Thomas Kennedy

Cloud and Network Architect-Specialist, Principal MSO Technical Leader, IBM

Description:

What is happening in the Managed Network Operators (MNO) is now happening in the Managed Service Operators in the modernization or virtualization of Broadband and Wireless connectivity services. New Virtual and Cloud based services require a modernized operating model to address automation at scale, self-service connectivity, and zero touch. In this session we will discussing

Site Deployment, NFV orchestration and using a cloud operating model, and full xNF Life-cycle management.

Yesterday

- [10G Challenge: Fireside Chat with Phil McKinney and Cate McNaught](#) 1:30PM to 3:00PM (Innovation Theater)
