TRIBOLD 3.0™

The communications industry's most advanced
Enterprise Product Management software solution

TIME TO TAKE CONTROL

These are challenging times for the telecoms and media sectors. Fierce competition is lowering margins. Converging technologies are making product differentiation problematic. Cost pressures are mounting. Customers are treating products as disposable commodities while brand loyalty is fast becoming a thing of the past.

Facing these difficulties, Communication Service Providers (CSPs) are discovering that delivering innovative, profitable products is an increasingly demanding task, but one that has become paramount to their ability to effectively compete and deliver in this fast evolving industry.

Enterprise Product Management is about taking control over these challenges and providing the key to how CSPs go to market and with what products and services.

product • performance • profit

...

never underestimate the power of identity

hackers in an increasingly vulnerable digital world

Without question, the power of the digital economy permeates nearly everything we do. Evolving well beyond eCommerce and mBanking, the connected society includes social media, video subscriptions, file sharing, ride hailing, and home stay, all of which have quickly become a regular part of our lives every day. While the convenience is a lure, the risks can be alarming. These applications often contain payment and other confidential information that need to be secure in order to ensure that only the right people are properly entitled to access the information or assets involved. To minimize a problem further, applications are constantly trying to improve the user experience by reducing the friction in the authentication process. Unfortunately, making access easier for the customer is also making it easier for fraudsters.

"Hackers can have access to your bank accounts, bitcoin, payment services and many other aspects of your digital life before anyone is the wiser."

According to an article by CBS News New York, a woman lost more than \$30,000 USD when a fraudster posing as her bank took over her account. The article says the scammer did this by telling the woman her account was compromised, then sent her text messages to change her password – giving the scammer access to her account. Scammers can have access to your bank accounts, bitcoin, payment services and many other aspects of your digital life before anyone is the wiser. That is a powerful proposition for fraudsters.

Clearly, the digital world is increasingly vulnerable. Fraud is getting progressively sophisticated and more difficult to prevent resulting in billions of dollars in financial losses annually. Victims are not only unsuspecting senior citizens and elderly disconnected millennials, but also discerning professionals and every-day consumers. Even the chief cybersecurity officer of the very organization vested with the responsibility to protect consumers by spotting, and preventing, deceptive or fraudulent practices in the marketplace has been a victim of fraud. Interestingly, the telephone number, which is the entryway for much of this fraud, is being exploited by adept criminals in novel ways. Fortunately, the victims no longer need to be victimized because much can be done to protect consumers from this type of identity theft and related harms.

Dynamic Product Management for Communication Service
Providers (CSPs) – The Time is Now

A Stratecast Whitepaper

Ebooks

The image shows a woman with long brown hair, wearing a grey blazer over a white top, smiling and talking on a black smartphone. She is holding a green folder or tablet under her left arm. In the background, a modern office interior is visible with other people working. In the foreground, a white, rectangular signal booster device with a series of vertical slots is shown. The device has a small screen and buttons on the front. The background of the image is a blue gradient with a white bar at the bottom. In the top right corner, there is a small logo consisting of three blue bars of increasing height, with the word "SOLID" written vertically next to them.

Better Cellular Service with SOLiD BARS™

In today's hyper-connected world, seamless mobile connectivity is both a basic expectation and a business imperative. Everyone has experienced the frustration of dropped calls, missed texts, or even complete signal loss the moment they step inside certain buildings.

The 2014 COMET Executive Summit

November 5 - 7, 2014 — San Diego, California

Pipeline continues its legacy of bringing together the world's leading service providers and technology innovators this fall at the 2014 COMET Executive Summit.

This exclusive event is gathering key executives from the world's leading operators with key technology developers and enterprises in an intimate symposium to explore the latest trends and challenges in communications and entertainment technology (COMET).

The COMET Executive Summit is a flexible, highly interactive format that is filled with unprecedented networking opportunities designed to build relationships that can be carried forward to solve the issues and challenges facing service providers and industry today.

Register today to stay on the edge of topics to be covered at the COMET Executive Summit, such as:

- Network security
- Big data & analytics
- Agile Architectures
- Network evolution & virtualization
- Customer experience management (CEM)
- Exploring cloud offerings
- Enabling new business models
- Delivering and assuring digital services
- Leveraging content

Attend CES 2014

Pipeline has arranged special accommodation rates more than half off the regular hotel rates for all CES attendees at the US Grant Luxury Collection Hotel, part of Starwood Hotels & Resorts Worldwide. Space is very limited.

Register and book your accommodations today!

IMPACT OF 5G ON LOCATION ACCURACY & LAWFUL INTERCEPTION

SS8

MATRIXX ONLINE CHARGING

The Need for Speed and Real-Time

Everything is moving to real-time. Consumers want ubiquitous connectivity and instant access to applications, media, information and social networking. In today's diverse communications marketplace, there are a number of factors that are driving service providers to interact with subscribers in real-time:

- ▶ Increased adoption of prepaid services and payment methods
- ▶ Bill Shock prevention and spend control
- ▶ Third party content and applications
- ▶ 4G and LTE network rollouts

As these forces create a new Telco 2.0 marketplace, three trends are apparent: IP networks are the de facto standard. The usage events from these networks and the services that run on them are growing exponentially. Service providers need to interact with subscribers in real-time to deliver the exemplary customer experience and control required in the all IP environment.

As these trends converge, network bandwidth becomes a coveted asset where the return on investment needs to be maximized. This can be achieved through the shaping of subscriber consumption with a subtle combination of segmented pricing models, service class options,

personalized offers and subscriber policies. Get it wrong and the customers will head to the call center or even churn. Get it right and you've created an informed, dynamic relationship with the subscriber, turning bandwidth usage threats into opportunities and delivering an individual and compelling customer experience.

Service providers are challenged to keep up with subscribers' growing appetite for real-time-based services, keep their competitive edge, and keep costs and operational expenses from spiraling out of control.

MATRIXX Online Charging Empowers Operators to Meet the Real-Time Challenge

MATRIXX Online Charging helps service providers meet the challenges of the Telco 2.0 market by providing the industry's fastest, most efficient real-time charging application.

MATRIXX is the only real-time charging solution that can provide the scalability and speed needed to move to an all real-time world, while providing an extremely low and predictable Cost Per Transaction (CPT).

MATRIXX Online Charging delivers sophisticated real-time rating and discounting capabilities, giving operators the edge to differentiate, personalize and successfully compete.

Its extreme performance supercharges operators to accelerate their service offerings and easily scales to cost-effectively manage surging network traffic.

Its stability and efficiency drive increased profitability by providing operators with predictable and measurable costs so that service profitability is determined and ensured before services are launched.

New Services. Delivered.

From the Global Leader in
Advanced IP Service Fulfillment
Solutions.

Business Services | Delivered.
Small-to-Medium sized Businesses (SMBs) are looking to leverage the latest technology in order to improve and efficiently grow their businesses. Many SMBs are now looking for Next Generation Operators (NGOs) who offer compelling, integrated business solutions that are quick to implement and easy to manage. This SMB market represents a new opportunity for many operators and Sigma Systems helps NGOs tap into the SMB market by providing them with all the necessary components to efficiently design, deliver, and manage next-generation business services.

Managing the Customer Experience Migrates to Mediation

Next generation communications networks are rapidly proliferating, creating an urgent need for mediation systems that address OSS-related Use Cases. At the same time, the need for CSP's to understand their subscriber's experience is increasing, regardless of the technology or network their services are delivered over. At the intersection of these two trends, mediation is being transformed into a bedrock for managing customer satisfaction and reducing churn.

DigitalRoute
Every bit counts

From wireless to wireline networks, CHR has the insight and expertise that empowers the services connecting customers and communities. We stand ready to partner with you on all your project needs—from concept to construction. Whether you're deploying new networks or launching next-generation services, from funding to field services, CHR is with you every step of the way.

CHR's Connected Services provide the platform for next-gen networks and brings them to life. Our expertise in execution enables IP evolution—guaranteeing improved network reliability and scalability to support the services that maximize ARPU, reduce churn and generate new revenue while achieving regulatory requirements and reducing CAPEX.
