

Building the Future with **Broadband**

Creating Communities

Communications service providers play a vital role in building rural America. Connecting unserved or under served communities through broadband technology improves their way of life and closes the digital divide by providing economic opportunities otherwise not possible.

CHR Solutions is a proven industry leader with over 75 years of experience and will help you invest in broadband. Our complete solution gives you the tools necessary to make strategic business decisions for building, marketing, and monetizing your network.

Powerful Partnership

Experience to power your project from start to finish and further.

CHR has partnered with Communications Providers, Electric Coops, and Municipalities to implement successful FTTx that enables better broadband.

We have experience implementing our industry-leading Customer Care, Billing and Facilities Management software (BSS/OSS) as well as designing and building fiber networks to over 2 million passings in North America.
